PROTECT & MAXIMIZE YOUR INVESTMENT
With Our Yearly Field Maintenance Programs
Now on their third generation, synthetic fields have commonly been promoted as maintenance-free. The truth is synthetic fields do reduce the amount of maintenance. We find it important for an owner to be realistic about what is necessary to maintain their surface to ensure its performance and safety.

REGULAR MAINTENANCE SHOULD BE PERFORMED TO PREVENT THE FOLLOWING:

- Premature degradation of fibers
- In high traffic areas, infill can migrate or displace resulting in uneven surfaces and unsafe impact levels
- Compaction of infill resulting in a “packed down” surface that is too hard or slippery
- Build-up of foreign debris in turf surface collected over time
Shaw Sports Turf has designed a multi-tiered maintenance program to support facility operators in the proper care and maintenance of their synthetic surfaces.

There are two levels of formal maintenance programs. They include the Shaw Sports Turf Basic Plan and the Shaw Sports Turf Plus Plan. Each plan will include field inspection and a maintenance summary report at each visit.

**MAINTENANCE PLAN DETAILS**

**SHAW BASIC**
- Field Inspection
  - Standard Grooming Visit
    - Clean surface and level infill
    - Remove any ferrous material
  - Written Maintenance Summary Report

**SHAW PLUS**
- Field Inspection
  - Premium Grooming Visit
    - Clean surface and level infill
    - Remove any ferrous material
    - Remove and clean infill
    - De-compact infill
  - Written Maintenance Summary Report

**FIELD INSPECTION INCLUDES**

- Infill Depth
- Visual Fiber Wear Analysis
- Seam Inspection
- Edge detail / Transition inspection
- Monitor High Use Areas
- Inspect Inlays

**TWO TYPES OF GROOMING (DEPENDING ON SELECTED PLAN)**

1. Standard Grooming
   - Utilize synthetic turf equipment to level the infill and brush fibers upright for the entire field.

2. Premium Grooming
   - Utilize synthetic turf equipment for deep cleaning to remove foreign debris and contaminants. During this process, we utilize equipment with a large magnet to remove all ferrous metal from the field.
   - Utilize synthetic turf equipment to de-compact infill material. This will loosen the infill material to increase the shock absorbency and support the upright fiber.
   - Deep cleaning removes dirt and contaminants and also improves surface drainage.

**WRITTEN MAINTENANCE SUMMARY REPORT INCLUDES:**

- Detailed documentation of the field safety inspection performed
- Detailed documentation of the repairs needed
- Thorough checklist of the maintenance plan provided
- Infill depth measurements at 10 locations from before and after grooming
- Ongoing maintenance recommendations
- Final inspection and walkthrough with the customer

## Pre-Field Inspection

- **Pre-Inspection of:** (please provide pre-inspection photos)
  - All Seams
  - Hash Marks
  - Numbers
  - Arrows
  - Logos
  - Endzone Lettering
  - Five Yard Lines
  - Perimeter Lines
  - Sideline Areas
  - Secondary Sport Lines
  - Crease and Goal Areas, Penalty Kick, Corner Kick
  - Visual Fiber Wear Analysis
  - Edge Detail/Transition
  - Monitor High Use Areas
  - Provide Pre-Inspection photos to Shaw Sports Turf

## Overall Field Analysis / Review of Repairs Needed:

- Basic
- Plus
- Field Inspection
- Level the infill
- Maintenance Summary Report
- Final inspection and walkthrough with customer
- Field Inspection
- Deep cleaning to remove trash/debris/metal
- De-compact infill
- Level the infill
- Maintenance Summary Report
- Final inspection and walkthrough with customer
